Meet Beacon Quality, the leading layered process audit software helping Quality Managers slash quality costs

High-Frequency audit software built for the mobile era

The easy-to-use mobile audit platform for bigger, faster quality results

1 Cut administrative busywork

Automated scheduling, reminders and data analysis let up to 2 full-time employees do more important work.

2 Accelerate continuous improvement

Get more value from Layered Process Audits with tools to protect audit integrity and close the loop on non-conformances.

3 Get instant insights

Custom dashboards give you a real-time snapshot of processes, no manual data entry required.

> ## Cut admin time by up to
> # 85%

Automatic email notifications

Send reminders with links to mobile checklists and notify supervisors of missed audits.

Smart scheduling

Assign audits around time off, holidays and planned downtime, all in under 10 minutes.

Closed-loop corrective action

Record mitigations, launch corrective actions and shorten time to closure.

> ## Build a culture of quality

Ensure process standardization

Prevent pencil-whipping with randomized questions, rotating auditors and timed audits.

Add visual standards

Include photos with audit questions to better show good vs. unacceptable.

Cut defects and costs

Real-time audit data lets you act on process errors ASAP, before they cause defects.

Achieve ROI faster

Cloud-based mobile platform means you're up and running in 6 weeks, not 6 months.

> ## Simplify Audit Reporting

User-friendly dashboards

Monitor KPIs and trends with custom dashboards, reports and distribution options.

Avoid blind spots and delays

Access audit data instantly, when findings are most actionable and problems are less expensive to fix.

Make data-driven decisions

Drill down to pinpoint problems, or roll up for a high-level performance view.

Real testimonials from our users:

See more testimonials on the software review website, G2Crowd.com.

"Beacon is an easy-to-use, intuitive tool that provides real-time insights into shop floor quality."

"The interface is easy to navigate, and training on the user roles is very simple. Mitigations are also very visible, helping us reliably address them."

"I like being able to input the schedule and let Beacon manage itself. Audits are conducted, mitigations are issued and assigned to the owner. Then the owners add their corrective actions. No more paper and tracking people down. It's all there!"

- iOS and Andriod Apps
- Cloud Based
- No Wifi needed
- Up and running in 1 hour
- 8+ languages
- Email reminders
- Attach photos and documents
- Drill-down reporting

What are Layered Process Audits?

Layered process audits focus on how products are made, rather than inspecting finished products. Layered Process Audits detect process errors early to reduce defects and complaints, building a culture of quality through leadership engagement and communication.

Several industries have adopted layered process audits to add extra verification around high-risk processes. GM and Fiat Chrysler both require suppliers to establish layered process audit programs with documented evidence of continuous improvement.
